Everything you have always wanted in a garage door

Your garage door is the single largest moving part in your home and it is used more often than any other doors or entries. At Hörmann, we understand how important it is to keep your most valued investment from the damages caused by nature and other unwanted elements. We are constantly pushing our knowledge and experience to provide a safe, secure, energy efficient and convenient access to your home. No matter which design suits your needs, you will never compromise on quality and safety with a Hörmann door.

We aim to satisfy your individual needs

At Hörmann we understand that not every home comes from the same cookie cutter. It is our goal to satisfy your individual needs. If you are unable to find what you're looking for from our product offering, please do not hesitate to contact your authorized Hörmann dealer / installer. You may be surprised how flexible we can be.

“A good name must be earned.”

This was the philosophy August Hörmann, founder of the company, believed in when he started manufacturing steel doors in his metalworking shop back in the 1930s. Since then, Hörmann has become one of the world's leading door manufacturers and a global leader in today's building components industry. The family's name has become synonymous to brand quality products covering a wide range of doors in residential and commercial applications. Constant innovation, quality assurance and close proximity to customers are the keys to the company's permanent growth and lasting success. Operated by the third and fourth generation, the grandson and great grandsons of the company's founder, Hörmann currently serves customers in more than 30 countries with a multitude of quality products.

1 German Engineered, American Made Quality

The Hörmann range of residential doors and openers are specially designed and developed to meet the requirements of the North American market without compromising the Hörmann standard for quality and design offering superior protection and safety.

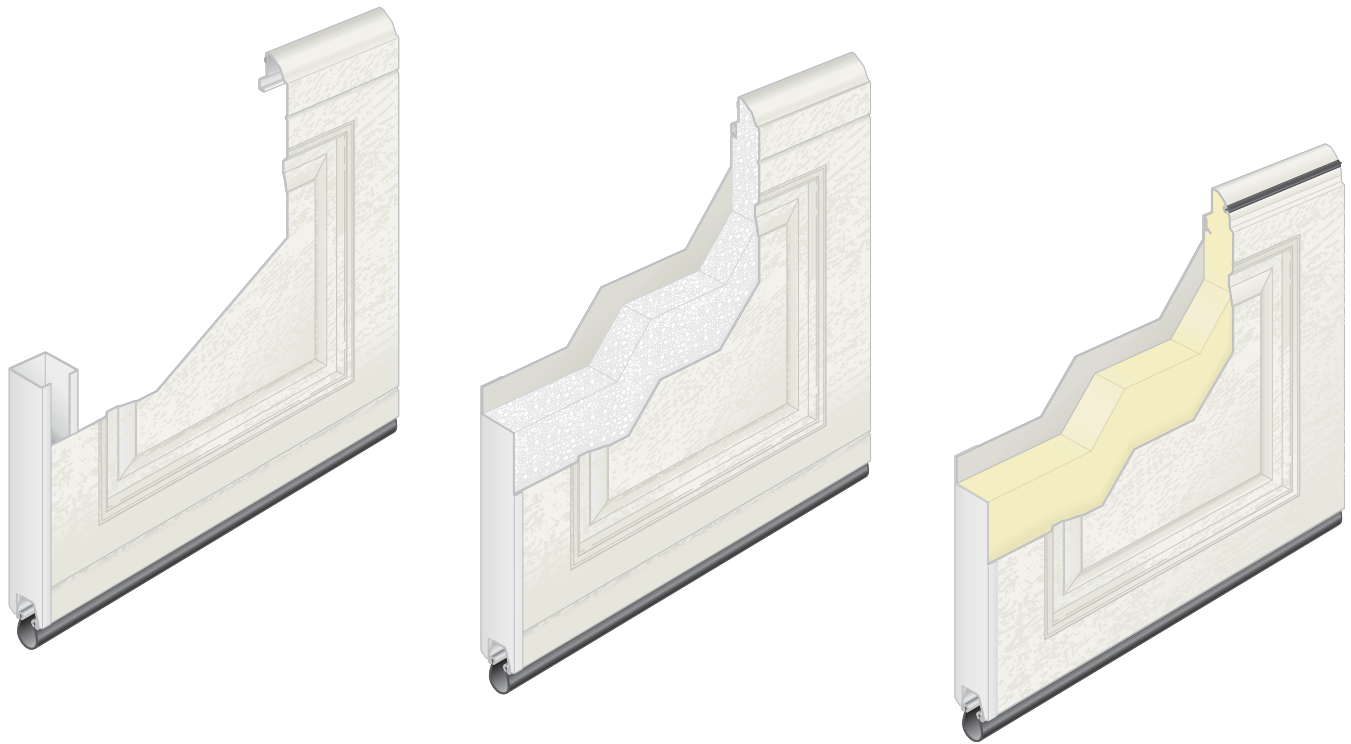

2 Uncompromising Safety

At Hörmann your safety always comes first. With our Exclusive FingerGuard™ pinch resistant section joints and components, the danger of trapped fingers is greatly reduced. The joint and hinges provide an excellent seal and prevent finger injuries inside and outside.

3 Highest Standards in Component Quality

Every individual door component is meticulously engineered and tested rigorously. Once they are up to Hörmann's high standards, these components are manufactured with the highest craftsmanship using only top quality materials.

4

Uniform Panel Designs

All Hörmann steel garage door series (Gemini, Orion and Taurus) share same panel design impressions. Unlike our competition, in which the shapes, sizes and distances between the panels are different from one model to the next, the Hörmann steel garage doors have exact same look throughout the collections.

5 Maximum Protection Against Elements

Most Hörmann Garage doors come standard with a plethora of factory installed seals to maximize the protection against the outside elements while further enhancing the insulation properties of your garage door.

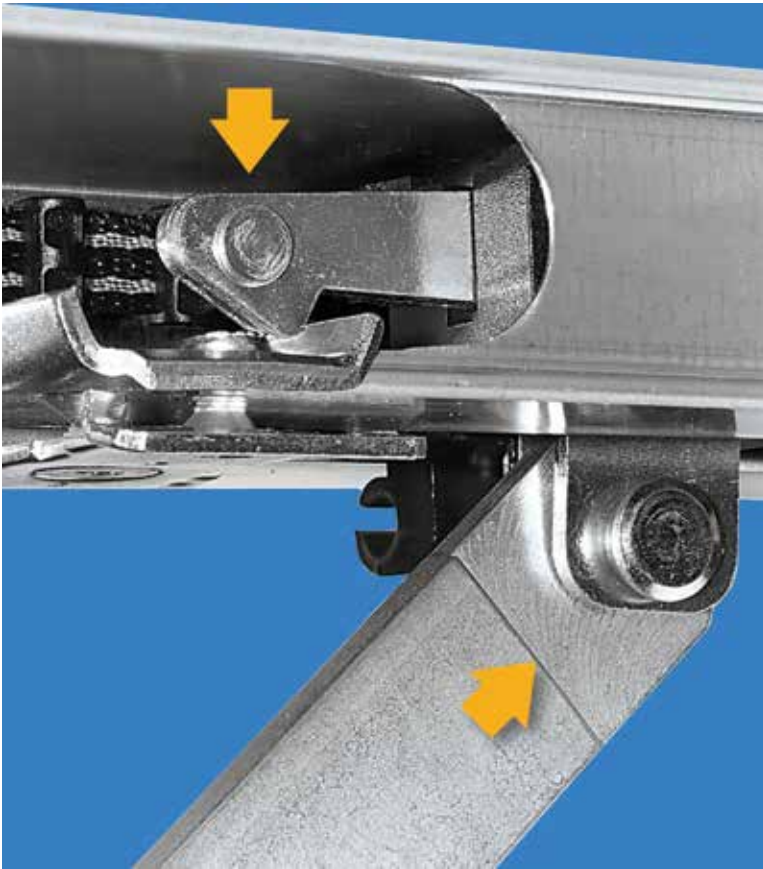

6 Superior Energy Efficiency

Hörmann offers a wide choice of insulation to make your door well insulated in harsh climates. Whether polystyrene core or injected polyurethane foam insulation, your home is well protected from outside elements.

7 Perfect Complement

The Hörmann SilentDrive® Openers are a perfect match for your garage doors. With an efficient DC motor construction and a very quiet operation, it is an ideal companion for your Hörmann garage door.

**LIMITED LIFETIME
WARRANTY***

8 Extra Layer of Security

In all Hörmann SilentDrive® openers, the anti-lift kit automatically engages in the operator rail's stop when the door is closed and locks immediately after. It is secured against forced opening to secure the door even when the power fails.

9 Industry Leading Warranty

Most Hörmann residential door sections are protected with a Limited Lifetime warranty. We also include unmatched hardware and spring warranties across our entire product line.

*Excludes Solaris 8200 & Polaris 9200 Series

Natural beauty of real wood without compromising quality

The Hörmann Polaris Collection series of doors are constructed from a fine selection of real wood handcrafted with careful attention to detail to provide a durable, prestigious and long lasting quality door. Natural wood offers a distinctive and unique grain texture that will give your home a special appeal. Choose from a wide selection of standard designs or create your own look from a simple yet elegant E-Series or the more sophisticated C-series.

ALUMINUM / ARIES 8200

Classical natural look and unbeatable durability

Beautiful natural look with the durability of aluminum

The Hörmann Aries Collection offers the durability and weather resistant properties of aluminum with the sophisticated appearance of natural wood. The virtually maintenance free Aries Collection features commercial grade extruded aluminum stiles and rails mechanically fastened at joints to create a high strength door frame.

Surprise your neighbors with truly lifelike wood grain powder coated finishes without compromising the modern conveniences and the durability of an aluminum door.

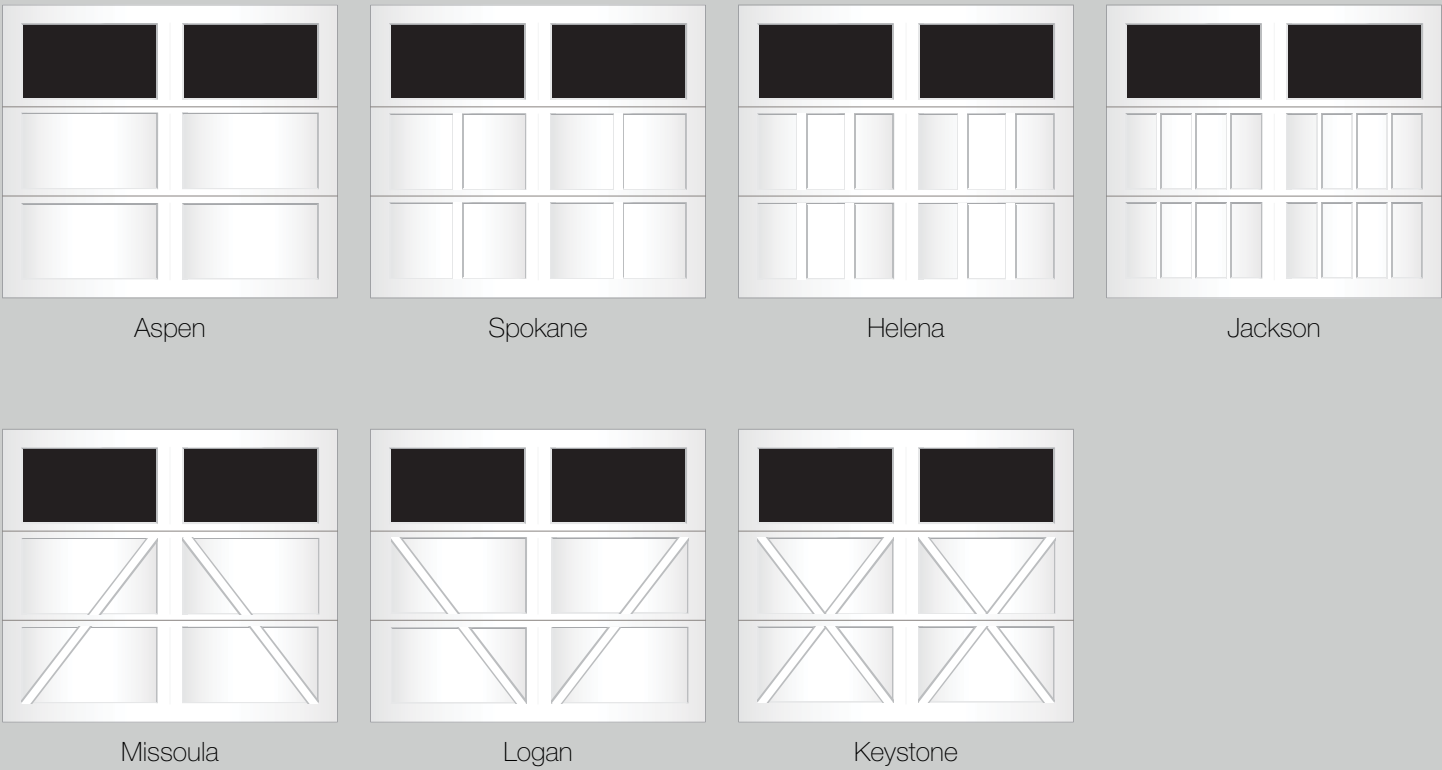

FEATURE VALUES

- 2" thick extruded 6063-T5 aluminum with optional expanded polystyrene form-fitted insulation
- Precisely engineered Tongue and Groove section joints
- Extruded aluminum design and mullion overlays are permanently adhered and configured to allow many design styles
- Many custom arch designs are available
- U-shaped vinyl bottom weather seal factory installed for weather protection
- Clear 1/8" single pane glass standard (Other glass options available)
- Optional 1/2" insulated glass available

Teratone	Black	Agate Grey	Slate Grey	Pigeon Blue	Signal Blue	Sapphire Blue

CUSTOM COLORS

Your home is as unique as you and your family so why settle with a color selected from a handful of choices? Express yourself with the Galaxy Paint System.

The Galaxy Paint System utilizes today's state-of-the-art color matching technology to match any submitted color within the tightest of tolerances.

With the Galaxy Paint System, you will not only be confident that you have purchased the highest quality and safest garage door for your home but one that will match the color of its exterior with a factory finish that will last.

PAINT SYSTEM FEATURES

- Galaxy Paint System is available on the following door series: Orion 3200, Taurus 4250, Phoenix 5200, Tucana 5250 & Solaris 7200.
- Choose from any of the 28 semi-custom colors or submit a sample of your desired color to your Hörmann Dealer for a genuine custom finish.
- Galaxy Paint System is a factory applied top coat sprayed over the pre-painted steel. This is an added layer of protection and does not affect the Limited Lifetime warranty of the sections, however, the top coat itself will be covered for a period of one (1) year against crazing, blistering, peeling, chalking, or fading as defined in the Galaxy Paint System warranty.
- The paint system utilizes a high quality catalyzed acrylic urethane that is far superior to any exterior paints that are typically used by a painting contractor.
- To prevent webbing or missed spots, all components are painted separately, cured and then assembled prior to packaging.
- Considering the cost of rollers, brushes, cleaners, drop cloths and time spent while painting the door yourself or hiring an expensive painting contractor, the Galaxy Paint System provides a more cost effective solution and will retain the superior finish much longer.

HÖRMANN ADVANTAGES

- **Unlimited color matching capability for a perfect color match**
- **Paint that far exceeds the quality of anything available for on-site finishing**
- **Factory painted prior to final assembly**

Extra Peace of Mind

The Hörmann Extreme Package door upgrade is a perfect choice for any homeowner or builder who is seeking peace of mind from a durable and well built product with premium components without compromising safety and the flexibility of choices.

Extreme Package upgrades are available for Hörmann Orion 3200/3210 and Taurus 4250 series and includes all the features that you can only expect from Hörmann such as pinch-resistant section joints, factory installed between section weather & side seals and much more.

With the heavy duty hardware added to an already solidly built design, the new Extreme Package upgrade is windload certified to minimum 90 MPH. Each door size is now available with the certified drawing with drawing number and maximum design loads allowed.

EXtreme

Commercial Grade Hardware

The usage of heavier steel means the extra layer of protection. The door components such as hinges become mechanical plates rather than the moving parts for rugged use in harsh climates and the extremely windy and open areas.

Extra Jamb Brackets & Side Locks

In high wind areas, the jamb brackets and side locks included in the Extreme package minimize the damage caused by bending and deflection of the door mounting and secure your door against back action and reduces the risk of any damage to your opener or exposing your garage to the elements or intruders.

3 Inch Struts

In most cases, the Extreme package includes 3" struts of a heavier gauge galvanized steel to make your door a structural part of your home. The 3" struts provide extra strength and prevent gradual deformation of your door from those extreme conditions in rugged urban and rural areas.

25,000 Cycle Torsion Springs*

Whether you live in an extreme condition or have a busy garage, 25,000 cycle torsion springs offer you the extra long life you need in harsh environments or multiple daily openings and closings.

* Extreme package is also available with extension springs.
Extension springs are NOT covered in the Limited Lifetime Warranty.

**Windload
Certified to
Min. 90MPH**

Windload Certified†

Extreme package upgrades are tested to withstand winds up to 90 miles per hour for those open areas where high gusting winds are a factor.

† To purchase and install a Hörmann windload certified door, customer assumes the responsibility to review and follow the pressure requirements established for the application as defined in the local building codes.

Limited Lifetime Warranty

The Extreme Package upgrade offers you the peace of mind by extending warranty on door sections, hardware and springs* as long as you own your home.

The Perfect Match

Hörmann SilentDrive® garage door openers are the perfect companion to your garage door. All SilentDrive® openers are built with a DC motor and a composite aramid fiber reinforced belt drive system that provide a very quiet operation, dramatically enhancing your total quality experience. The adjustable “soft” start and “soft” stop feature allows minimum wear on the door and opener, ensuring a quiet-running door at every stage of opening and closing. With a SilentDrive® opener you’ll benefit not only from the safety features compliant with UL 325 requirements but from the unique Hörmann Beltension Guard™ and the EngageLock™.

1 Beltension Guard™ is built into the opener rail to maintain proper belt tension for the life of the opener. This ensures quiet, trouble-free operation, and eliminates costly and inconvenient service calls.

3 Aramid fiber reinforced belt will not rust, limits wear & tear, resists moisture and never needs lubrication. This special belt system provides a quiet ride and many years of worry free operation.

2 EngageLock™ is also built into the opener rail to eliminate door back drive action in the event of a power loss, securing your home and property.

Standard Accessories

Deluxe Wall Console Station

Operates the door from inside your garage and independently operates opener lights. A separate lock button eliminates the need to unplug the operator during extended absences.

Mini transmitter

The conveniently sized transmitter allows you to control up to four separate doors.

Optional Accessories

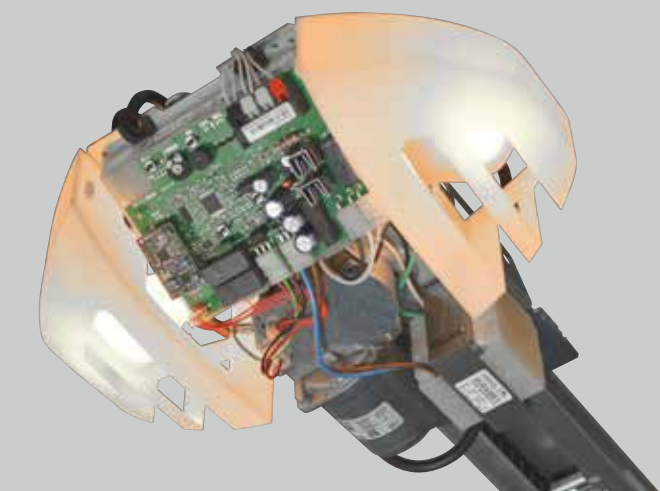

Wireless keypad

Lighted and covered keypad allows for wireless remote access to your garage with your own programmable personal security code for your convenience. Stores up to 3 personal codes.

Single button transmitter

Used as an additional device for operating a single door.

All SilentDrive® openers are built with a DC motor and come with a belt drive system. The DC motor and Belt Drive System make for very quiet operation, dramatically enhancing your total quality experience.

The dual bulb and lens covers diffuse the lighting in your garage while you enter or exit your garage. A three minute auto delay shuts your lights off automatically for your convenience.
